

ICNet Members' New England Research & Project Survey

Research/Project Focus	Extend NOAA Atlas 14 (Precipitation Data To New England and New York
Research/Project Description	Update NOAA precipitation methods to include as much as 50 years of additional data since last major releases (1961, 1964, 1977)
Primary Category*	Hydrology
Geographic Location	New England and New York
Funding	MaineDOT, other state DOT's, and NOAA
Contact	Charles Hebson, MaineDOT: Charles.Hebson@maine.gov
Infrastructure sectors effected, subject area	Bridges and highways
For modeled climate or sea level rise projections, AOGCM or other sources used	N/A
Other Information, data, models, used	NOAA statistical methods

Time periods analyzed	Complete historical record
Status /Date submitted to ICNet	In Progress. Submitted to ICNet Oct, 2013
Brief key findings to date	N/A
Key publications/reports?	N/A
Other information (e.g., web links to technical reports).	http://www.nws.noaa.gov/oh/hdsc/index.html

*** Categories: Roads, bridges, and culverts; Pavement and/or soils; Hydrology (study of data/floods); Environmental/water resources (stormwater, drinking water); Transportation assets (network); Climate model output**
